

### **GMA-D - 6 stations**

### **GMA-D - 8 stations**

**Semi-automatic plant to match with separated unit for scrapping and cutting**

For the production of flexible type blood filter in PVC film

### Composition

#### **GMA-D - 6 stations**

- High frequency welding press pneumatically operated for the filters
- High frequency generator built in the press frame
- High frequency welding press pneumatically operated for the tubes and perimeter
- High frequency generator built in the press frame
- Turntable with 6 working station with adjusting turning speed
- Liquid circulation refrigerating unit
- Control panel with PLC and touch screen

#### **GMA-D - 8 stations**

- High frequency welding press pneumatically operated for the ports
- High frequency generator built in the press frame
- High frequency welding press pneumatically operated for the filters
- High frequency generator built in the press frame
- High frequency welding press pneumatically operated for the tubes and perimeter
- High frequency generator built in the press frame
- Turntable with 8 working stations with adjusting turning speed
- Liquid circulation refrigerating unit
- Control panel with PLC and touch screen

### Technical Characteristics

Presses reels-holder dimension:	450x550 mm
Turntable working station dimension:	450x550 mm
Feeding voltage (other voltages on demand):	400 V (+/- 5%) – 3 PHASES + EARTH - 50 Hz

**FULLY AUTOMATIC PLANTS ON CUSTOMER TECHNICAL SPECIFICATIONS ON DEMAND**
