

GMA-D - 4 stations
to be combined with separate units for punching and cutting

For the production of blood bag in calendered PVC film

Composition

- High frequency welding press pneumatically operated (or with servo-motor)
- High frequency generator built inside the press frame
- Turntable with 4 working stations with adjustable rotating speed
- Control panel with PLC and touch screen

Technical characteristics

Welding press maximum closing force (adjustable):	1600 kg
Welding press electrode-holder plate dimension:	700x800 mm
Turntable working stations dimension:	700x800 mm
Output power of the generator:	20 kW
Feeding voltage (on demand other voltages):	400 V (+/- 5%) – 3 PHASES + EARTH - 50 Hz
